

How to Post Source Code on WordPress Blog

So you've installed WordPress and want to blog about code. Yay! You're a hero and I thank on behalf of myself and coders everywhere. Here's what you'll need to do and think about to actually get publishing blocks of code.

In this post We will show **how to Post Source Code on WordPress Blog**.

so, lets start..

1. First you need to go wordpress dashboard.
2. go to Plugins >> Add new
3. go to search box and type "crayon syntax" press Enter.
4. Choose the first plugin which is **Crayon Syntax Highlighter**. >> install >> Active.
5. Now go to Add new post.

6. Go to text view, and there is a option for crayon.

Done...

if Any problem then Watch Below Video.
